SUBJECT: Asbestos Declaration

Dear Valued Customer,

fischer CANADA Stainless Steel Tubing Inc. is one of many manufacturing locations of the **fischer** Group of companies which is headquartered in Achern, Germany. We manufacture laser-welded stainless steel tubing for a variety of industries including automotive exhaust systems, structural steel for bus frames, and oil & gas applications, among others.

All products manufactured by fischer, except for one product line, utilize only stainless steel. There are no additional materials, and specific to this subject matter, there is absolutely no asbestos or asbestos-related materials contained in the product. On the product noted above that does not utilize stainless steel, the product is manufactured solely with regular carbon steel, and similarly does not use any asbestos.

Therefore we declare our products, without exception, to be free of asbestos.

Sincerely,

Glen Walter
